OBJECTIVES
Participants will...

1. Evaluate existing traditional and virtual mentoring models
2. Identify key components necessary for a successful mentoring program.
3. Utilize existing recommendations to build core mentoring curriculum.

Nurse mentoring is considered an essential element of professional growth and development. From student nurse to experienced nurse, every nurse can benefit from a mentor. This special session is designed to teach participants the key elements of valuable mentoring relationships and what it takes to launch a successful mentoring program. Whether you are looking for a mentor, looking to become a mentor or would like to develop a mentoring program in your organization, this event is for you!
